

**Floor Statement of Rep. Jim Moran**  
**Safe Climate Caucus**  
**March 12, 2013**

Mr. Speaker, I would like to draw the House's attention to the compelling issue of Climate Change that the House majority continues to refuse to address.

There are a number of us who plan on speaking every day on the House floor on the need for Congress to take action on climate change.

We are making this commitment because this chamber is filled with such a large collection of climate deniers.

It is here in Congress where a long term strategy to address this issue will have to be crafted if we are to avoid the worst case scenario and the catastrophic consequences of climate change.

Today, there should be complete consensus on the science of climate change:

- that the higher concentrations of greenhouse gases over the past 50 years are due to human activity;
- that the rapid increase in global temperature could not have been caused by natural factors alone; and
- that the severe temperatures and extreme weather events we have experienced in recent years, including the devastation wrought by Hurricane Sandy, all fit into the predictive pattern of global climate change.

Failure to take action dooms future generations to more powerful and destructive weather events.

Mr. Speaker, it's time for us to take action.

Thank you.
